Ihor Mytyuk

Software Development Team Lead | Full-Stack Software Engineer

Reggio Emilia, Italy | +39 391 1196 793 | connect@igormytyuk.dev | igormytyuk.dev

PROFESSIONAL SUMMARY

Full-stack software engineer with 8+ years of experience building web, mobile and enterprise applications. Hands-on technical lead specializing in Angular, TypeScript and C#/.NET, with experience in software architecture, team coordination, performance analysis, system integration and developer productivity.

PROFESSIONAL EXPERIENCE

Software Development Team Lead | E80 Group S.P.A. | Jul 2026 - Present

- Coordinate WebUI engineering for warehouse automation projects, translating functional requirements into user stories and sprint plans, reviewing code and mentoring internal and external developers.
- Act as technical liaison between Project and Product teams, consolidating feedback, coordinating escalations and helping resolve cross-team engineering issues.
- Created .NET database model generators, AI agent skills for proprietary DSL development and a department-wide engineering training platform with shared technical documentation and tutorials.

Software Engineer | E80 Group S.P.A. | Jan 2026 - Jun 2026

- Customized enterprise WebUI applications and SDM integrations using C#/.NET Web APIs, SQL Server and proprietary DSL; supported customer integration testing for Gillette Andover.
- Investigated critical CPU and memory performance bottlenecks through browser profiling and diagnostic scripts; documented 50+ product issues and UX improvement proposals.

Software Development Team Lead | GAB Tamagnini S.R.L. | Jan 2023 - Jan 2026

- Led 5 developers delivering POS, e-commerce and business applications; introduced structured onboarding and collaborative Git workflows, reducing ramp-up time by 40%.
- Set architecture and code review standards across Angular, TypeScript, Node.js and .NET, reducing post-deployment defects by 30%.
- Improved deployment efficiency by 25% with Docker and GitHub Actions; accelerated backend delivery by 60% through reusable data models and development tooling.

Software Engineer | GAB Tamagnini S.R.L. | Sep 2018 - Dec 2022

- Built web, backend and Android applications with Angular, Node.js, .NET, Kotlin and Java, contributing to an 80% expansion of the company product portfolio.
- Developed an Angular/.NET marketplace integrating Stripe and Satispay and processing 1,500+ daily transactions; delivered a restaurant ordering app deployed in 500+ installations.

TECHNICAL SKILLS

Languages and frameworks: TypeScript, JavaScript, C#, .NET, Angular, Node.js, SQL, Kotlin, Java, Three.js

Engineering and tools: Software Architecture, REST APIs, SQL Server, PostgreSQL, MySQL, Git, Azure DevOps, GitHub Actions, CI/CD, Docker, System Integration, Performance Profiling, Developer Automation

EDUCATION AND LANGUAGES

EQF Level 4, Information Technology and Telecommunications | Istituto Superiore Silvio D'Arzo | 2019

Languages: Italian (Native), Ukrainian (Native), English (Advanced), Russian (Proficient)
